

# Boost

ECE R129/03, 135–150 cm

The name says it all: our Boost seat booster is perfect for your little one!

Time flies by: it seems like your little one has only just finished their first day at kindergarten and before you know it, they are getting ready to start school. And by then, there's usually more than one child to transport, as they always want to be with their best friend or the kid from next door.

This is where the Osann Boost comes into its own: thanks to its universal installation with a 3-point belt, it can be used in almost any car and, despite its compact size, it offers great comfort – including comfortable armrests and an ergonomically shaped seat.

And if there are any little accidents on the back seat, the removable and washable cover means they can be dealt with easily. Our boost really is an everyday hero.

## Features

- Universal installation in all standard cars
- Large ergonomically shaped seat
- Comfortable armrests
- Optimal belt run thanks to belt guide
- Removable and washable cover
- Robust plastic core
